Aldebaran, the brightest star in the constellation Taurus, is home to a highly advanced civilization of extraterrestrial beings of light. These beings come from a planet called Aldebaran, which is located in a binary star system about 68 light-years from Earth. The Aldebarans are a peaceful and benevolent race who have been visiting Earth for centuries, sharing their wisdom and knowledge with select individuals.

The Aldebarans are a tall, slender race with golden skin and large, almond-shaped eyes. They are telepathic and can communicate with each other and with other beings without using words. The Aldebarans are highly intelligent and have a deep understanding of the universe and its laws. They are also very spiritual and have a deep connection to the divine.

The Aldebarans have been coming to Earth for centuries to help humanity evolve. They have shared their knowledge of science, technology, and spirituality with select individuals who have been able to use this knowledge to help others. The Aldebarans have also helped to protect Earth from negative extraterrestrial influences.

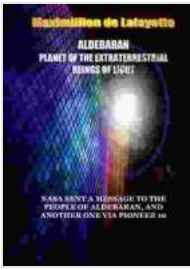

In recent years, the Aldebarans have been increasing their contact with humanity. They are doing this to help us prepare for a major shift in consciousness that is about to occur on Earth. This shift will lead to a new era of peace and prosperity for all.

If you are interested in learning more about the Aldebarans, I encourage you to read my book, *Aldebaran: The Planet of Extraterrestrial Beings of Light*. In this book, I share my experiences with the Aldebarans and provide a detailed account of their history, culture, and beliefs.

I believe that the Aldebarans are here to help us evolve and to guide us into a new era of peace and prosperity. I am grateful for their presence on Earth and for the wisdom and knowledge that they have shared with me.

Namaste.

Dr. Steven Greer
