The book is divided into three parts. Part One provides an overview of the health needs of school-aged children. This section covers topics such as the physical, mental, and emotional health of school-aged children, as well as the social and environmental factors that can affect their health.

Part Two of the book discusses the role of the school in promoting health. This section covers topics such as the school health environment, the school health curriculum, and the school health services. The book also

discusses the role of the school in addressing the social and emotional needs of school-aged children.

Part Three of the book discusses the challenges and opportunities for health professionals working in school settings. This section covers topics such as the challenges of working in a school setting, the opportunities for health professionals to make a difference in the lives of school-aged children, and the future of school health.

Public Health Practice and the School Age Population is a valuable resource for health professionals working with school-aged children. The book provides a comprehensive overview of the health needs of school-aged children, the role of the school in promoting health, and the challenges and opportunities for health professionals working in school settings.

About the Author

Dr. Jane Doe is a public health professional with over 20 years of experience working with school-aged children. She is the author of several books and articles on school health, and she is a frequent speaker at national and international conferences on the topic. Dr. Doe is a passionate advocate for the health of school-aged children, and she believes that all children deserve to have access to quality health care and education.
