5 BETTER DRIVING TIPS from Ford that will **HELP YOU SLASH YOUR FUEL BILLS**

1 DRIVE SMOOTHLY
To drive smoothly and anticipate road situations to smoothly adjust your speed, accelerating and braking. Aggressive driving such as rapid acceleration, speeding and braking can lower your fuel mileage significantly.

2 USE CRUISE CONTROL
Using cruise control on long stretches of highway helps maintain speed and conserve fuel. Activating your cruise control keeps you from unintentionally driving faster and with lower fuel efficiency.

3 LIGHTEN THE LOAD
To drive as light as possible by keeping only the most important items like an emergency kit, jumper cables, a small toolset, and a small jack in the vehicle.

4 SLOW DOWN
Speeding wastes lots of fuel. By driving 90km/h instead of 100km/h, you can improve your fuel efficiency by up to 10-15 per cent.

5 REDUCE AERODYNAMIC DRAG
Your vehicle is designed for good aerodynamics – but attaching a carrier or bike to the roof adds more wind resistance. If you spend lots of time on the highway or are planning a long trip, try to transport items inside the vehicle.
